

Cedar Park Pediatric & Family Medicine

Complete Medical Care for your Family

**We're excited to introduce
Fluoride Varnish Treatment right here in
our office to help prevent cavities!**

**Ask your nurse or provider about a Fluoride Varnish
Treatment at your Well Child Visit.**

Who qualifies?

Any child, 6 months through 3 years of age.
Recommend routinely at 12, 18 & 30 month well child visits.

Procedure:

Applying Fluoride Varnish is a non-invasive procedure that
can be done at a well child visit.

Purpose:

Our goal is to help prevent cavity formation which can save
thousands of dollars in dental expenses at an early age.

Your Child's Teeth are Important! Don't Delay – Prevent Decay!
